Action supported by the EU consortium to value the PO FESR Puglia 2007/2013, Action 6.3.3, "Support interventions to projects of international promotion of Apulian PM1"

WHO'S WHO

I&S is a limited liability consortium, established in 2002, dealing with the “production and commercialization of software and hardware, with focus on the strategic activity of consultation as for the application of technologies to Health, Public Administration and Enterprises is concerned”.

I&S promotes, coordinates and controls brilliantly the activities of the consorted enterprises, thank to the study, the design and the realization of works, goods and services in the industrial and commercial field, and of the technological services in particular.

The consortium has been working for many years in the ICT (Information and Communications Technology) field; in particular it deals with the realization and application of IT systems to public administration and private companies.

The last years have been consecrated in particular to the application of IT systems also and above all in the field of Health and of the Public Administrations.

Thanks to its organization, to the stable experience and to its highly qualified management, it is able to represent directly and efficaciously the interests of the companies it cooperates with.

SERVICES

The Professional and Technological Services proposed by I&S answer to the company MISSION representing for the Members, the Partners and the Clients a real “opportunity” of their original competence, Creating Added Value. Allowing, through this fly-wheel, to increase activities and develop new opportunities in the continuous attempt to improve the potential, also following the VISION.

THE PROJECT

The I&S Expoest Project is an International promotion project between Italy and Albania, that contributes to the achievement of the company VISION, in order to increase and protect the individual and common POTENTIAL.

Thanks to this project we favour an internationalization path that, above all through the aggregation of enterprises involved, can concretely increase the competitiveness on the Balkan market, but also on the local one of the I&S Consortium, thanks to the added value that can follow the internationalization action; the project determines a promotion process of the Consortium itself and will be realized tank to the support of Regione Puglia, through the acquisition, the strengthening and the sharing of resources and of the know-how that are functional to the penetration and to the protection of the foreign market.

I&S has involved three of its more competitive members in the segment of the market detected in the project Enter Price srl, Insoft 2000 srl and Bi.Solution srl.

It aims to create commercial opportunities in its own business, that is to say the application of technologies to the Albanian production sectors:

- Commercial and industrial cooperation.
- Legal field (company law) and local fiscal field (necessary premise to support its own investment in that area).
- Sustainability of its own presence on the Albanian market in the medium-long term, to get the opportunities of development present on a dynamic economic area.
- Partnerships, joint venture and cooperation with economic local subjects.
- Detection of the fields of reference: focus on the industrial / production sector.

AIM OF THE PROJECT

The I&S Expoest Project identifies in the field of the IT technologies applied to the Public Administration, to Health and to the industrial field, the economic district to promote in the Balkan area (Albania) and clearly defines a structured path of internationalization characterized by the actions below mentioned:

- Cloud for the public administration;
- E-Government;
- Information and Communication to the Albanian production companies;
- Management of sensitive information;
- Desk-to-Desk for Companies;
- Know-how exchange;
- On-line registrations;
- Driving Licence.

SPECIALIZED PERSONNEL

The support of the internal personnel involved is fundamental for the success of the project.

The support of local and Italian professionals is essential: their skills are able to promote occasions of international development of the Consortium, actions of research of partners and assessments of joint ventures in the field of the international technological transfer. The project is coordinated by and expert export manager for the strategic choices, result of a detailed feasibility study, able to promote the strategic addresses after and adequate analysis of the market, subject to the sharing with the whole management of the Consortium.

FOLLOW-UP

The Consortium is going to ride a moment of International growth, the judgement is positive and the ambition is to continue with more and more decision towards a stabilization of the Albanian area, waiting for new inevitable opportunities.
